

# WE ARE LOOKING FOR A MASTER'S STUDENT

- Are you studying molecular biology/ pharmacy/ biochemistry?
- Are you looking for a young and motivated group to conduct your Master's thesis in?
- Do you want to work in an interdisciplinary team?
- Are you interested in investigating therapy-resistance in highly advanced cancer cells?

## YOU WILL BE:

- Using a screening platform to identify pathways that are involved in cancer progression.
- Testing new compounds in cell culture models for advanced and metastatic cancers to find potential therapy targets.
- Learning about cancer cell biology and improving your skills in methods such as cell culture, viability assays, click chemistry, SDS-PAGE, Western Blot and FACS.

## INTERESTED?
